## Ultimate 64 Web Music Player

*under active development* Use any device at your home with a web browser, to play your favorite SID songs. Designed to be used with your mobile phone to have an easy way to control the music that is coming out of your C64. Once the proxy is running, you can use the player URL to access the application. For easier mobile/tablet usage.

Go to the project page for instructions on how to get it running, if you run it as a Progressive Web App (PWA), be sure to clear cache when there are updates.
