Random small project programs

People use the C64 for their own programming projects, be they modest (or not). This page is not to list every little program.

So what makes these special? - It is that the creator posted about their project in a relevant C64U forum and we show love for their work by listing it here.

Games

Word games

A clone of Wordle for the C64 (FB post creator

- https://github.com/milesdyck/logos64

Simulation

A 'Commodore business sim'.This is a fantasy sim rather than a strict "what if" business model.
