Welcome

This is a 🖳 Wiki, a website with an 'edit' button. The intention is build a resource with information relevant specificity for the **Commodore 64 Ultimate (C64U)**. As the C64U is nearly identical to a classic C64 but with extra built-in functions those aspects are the focus. There are many online resources about the C64 in general. We do not have to repeat them here. Just point to those resources so C64U users, who may be new to the C64 World, can find them.

This Wiki is setup by Walter. It would be very nice if this project to create C64U documentation grows beyond a 'one person project' to a little documentation project community.

As this is still *the very early days* of this project it is still very empty. If you like to help out building this out please register on this wiki and join me. Be not afraid to mess things up. It is a wiki and that means every edit can be undone very easily.
