

TIPS & TRICKS FOR ULTIMATE DEVICES

A selection of quick tips and tricks to make your life with your ultimate device even more fun!

- Experiencing garbled text and/or graphics in a demo or game? Check the TURBO BOOST settings and make sure to have set it to **OFF**. Even having Turbo set to 'Manual' mode, at only 1 MegaHertz, can throw off the timings needed for these games or demos to be displayed properly.
- CommoServe hack to include 'assembly64' - See [commoserve_hack_to_include_assembly64](#)
